

Focus on Timber Worksheet 07: Hand Tools

Complete the following tables

Name of tool	Graphic	Purpose	Safety Tips
			<p>Always provide downward pressure when sawing to keep the saw and timber pressed against the bench hook.</p>
			<p>Never rush while sawing – always use steady regular rhythm to avoid the saw jumping and marking the timber or cutting the hand hold the timber</p>
<p>Coping Saw</p>		<p>Use to cut intricate shapes in timber</p>	

Name of tool	Graphic	Purpose	Safety Tips
		Used to flatten and smooth a piece of timber.	
Wooden Mallet			Use carefully as a miss could cause the mallet to strike your hand
Warrington Hammer		The smaller face is designed for hammering in smaller nails and panel pins	
Chisel		For cutting and removing timber from joints and tight corners
